---

The Croatian Ministry of Environmental Protection and Green Transition has initiated a procedure to determine the need for an environmental impact assessment for the planned ...

The project is far from finished. The next phase includes the installation of a battery energy storage system and a second solar power ...

In September 2020, KONCAR commissioned the 3.5 MW Vis SPP, the largest solar power plant in Croatia at the time. In November 2020, we contracted the development of the 1 MW battery ...

The project is far from finished. The next phase includes the installation of a battery energy storage system and a second solar power plant with an additional 40-megawatt ...

An energy storage system will soon be installed at the largest solar power plant in Croatia, which has a capacity of 3.5 MW, said Zeljko Tuksa, President of the Managing Board of Koncar - ...

Subsidies for energy storage facilities linked with new production capacities are increasingly becoming a standard in European countries. The latest example comes from Croatia.

The development will support the installation of up to 60 megawatts of grid-connected battery storage capacity and the ...

1500V 250A Energy Storage Connector Key Features: High Power Handling: With a current capacity ranging from 150A to 250A, our 250A energy storage connector effortlessly handles ...

Energy storage development faces restrictive provisions, and RES Croatia is advocating for a clear regulatory

framework and incentive programs for battery storage systems.

The Croatian Ministry of Environmental Protection and Green Transition has initiated a procedure to determine the need for an ...

According to PV Magazine, solar installations in Croatia are on track to surpass 1,000 megawatts (MW) by the end of this year--a ...

The development will support the installation of up to 60 megawatts of grid-connected battery storage capacity and the deployment of a VPP platform, allowing real-time ...

In September 2020, KONCAR commissioned the 3.5 MW Vis SPP, the largest solar power plant in Croatia at the time. In November 2020, we ...

According to PV Magazine, solar installations in Croatia are on track to surpass 1,000 megawatts (MW) by the end of this year--a significant milestone in the country"s ...

Croatia"s Ministry of Environmental Protection and Green Transition has initiated the process to determine if a full environmental impact study is necessary for the proposed 99 MW ...
