-----

In 2025, capacity growth from battery storage could set a record as we expect 18.2 GW of utility-scale battery storage to be added to the grid. U.S. battery storage already achieved record ...

Battery energy storage system (BESS) deployment in the United States is accelerating as rising power demand, including from data centres, drives the need for flexible capacity and grid support.

In this report, our lawyers outline key developments and emerging trends that will shape the energy storage market in 2025 and beyond.

In 2025, emerging markets for storage will be on the rise. Saudi Arabia will lead the charge, fuelled by its expansion of solar and wind generation.

As we look ahead to 2025, the North American energy storage sector is poised for another transformative year. Nationwide, we're seeing a robust project pipeline, advancements ...

BNEF's base-case analysis looks at a blanket 54% import tariffs, which immediately inflate four-hour turnkey system costs by 30% in 2025 (to \$266 per kilowatt-hour) ...

In 2025, emerging markets for storage will be on the rise. Saudi Arabia will lead the charge, fuelled by its ...

This work investigates the energy cost-saving potential by transforming the backup batteries of base stations to a distributed battery energy storage system (BESS), and proposes a deep ...

Demand for energy storage continues to escalate, the global battery energy storage (BESS) landscape is poised for significant ...

The 5G Base Station Backup Battery Market, valued at 6.48 billion in 2025, is expected to expand at a CAGR of 16.13% between 2026 and 2033, reaching approximately ...

Demand for energy storage continues to escalate, the global battery energy storage (BESS) landscape is poised for significant installation growth and technological ...

The 5G Base Station Energy Storage market is experiencing robust growth, projected to reach \$240 million in 2025 and maintain a Compound Annual Growth Rate ...
