To ensure an organized rollout, the Ministry of Information and Communications Technologies (MinTIC) developed the 5G Plan-- a national roadmap to support the ...

The deployment of 5G technology, which began in February 2024, registers 1,167 active stations in 22 cities. The operator Claro leads the expansion with 981 sites, representing ...

The document outlines a ten-month process (table 1), concluding in September 2023, to determine spectrum allocation for the 3.5 and 26 GHz bands designated for 5G services, and ...

Espoo, Finland - Nokia and Claro today announced the successful completion of the first stage of Colombia's largest 5G deployment covering over 1,000 sites nationwide.

As of June, the regulator counted some 1,167 5G sites, out of a total of 29,803 nationwide.

The project was completed four months after Colombian authorities issued 5G licenses, and is pitched as laying the ground for innovation across industrial sectors including ...

Currently, no operator in Colombia offers 5G mobile communication services. However, the national government, through MinICT, has drawn up a roadmap for the transition from 4G to 5G.

In Colombia, "Do you have signal?" is not small talk; it is a daily planning tool. A new CRC (Communications Regulation Commission) analysis put real numbers behind that ...

Then, our objective is to synthesize and share the most important concepts of 5G mobile technology such as the MIMO (multiple ...
