The resilience of ASEAN depends on investing in innovation, digital transformation and advanced manufacturing, as well as deepening regional cooperation.

ASEAN leads in the Intelligent Age with innovation, sustainability and regional stability, driving digital growth, climate action and global collaboration.

By 2030, ASEAN's digital economy is expected to more than double to \$560 billion. But obstacles in the region remain, such as funding for small businesses.

Meet the energy storage container - Southeast Asia's unsung hero in the energy transition. These modular powerhouses are reshaping how the region stores and distributes ...

ASEAN's fragmented reaction to US tariffs shows the need for greater solidarity and shared economic mechanisms - something shared by regional blocs across the world.

Our findings provide policymakers a second opinion on how to scale up solar and wind with battery storage to contribute to future significant ASEAN decarbonization.

ASEAN has emerged as a major economic and political bloc. At Davos 2025, ASEAN Secretary General Kao Kim Hourn detailed opportunities and challenges for the region.

The ASEAN Digital Economy Framework Agreement (DEFA) is a new strategic roadmap for the region to address the complexities and opportunities of the digital economy. ...

ASEAN's advantages, ranging from a large, young market to an embrace of the digital economy, offers a conducive environment to investors - leaders said at Davos 2025.

The US recently imposed tariffs of as high as 3,500 per cent on solar exports from four South-east Asian markets: Cambodia, Malaysia, Thailand and Vietnam. These countries ...

A case in point is in the Philippines, where coastal communities in Palawan were provided with solar container systems after Typhoon Haiyan. These have powered health ...

Black & Veatch's Narsingh Chaudhary highlights the potential for microgrids around Indonesia's and the Philippines' many islands, powered by a combination of solar PV and batteries with ...

Technological advancements are dramatically improving solar storage container performance while reducing costs. Next-generation thermal management systems maintain optimal ...

The country's first ever solar-plus-storage hybrid project - the 40MW pilot battery storage system plus 120MW solar PV power plant at Alaminos Solar site in the municipality of ...

Inclusivity and sustainable innovation are key to a strategy that is pushing the ASEAN region to the top of the world's annual economic growth league.

Contemporary Amperex Technology Co., Ltd. (CATL), a global leader in innovative new energy technologies, has officially signed an agreement to supply a 2.2 GWh battery energy storage ...
