-----

Hello everyone, I just bought my first car, a 2014 Volvo V40 T3, and a warning appears on the dashboard that says "low battery charge." The car is recently...

Going to change the service battery in my 15 V40cc D2. Anything I need to be ware of or look out for ??

I'm having a few issues with my v40 which include the air con only blowing cold out one side and warped disks, the immobiliser cut in at 50mph once (but I think that was key ...

This article will explore the necessity, definition, methods, and pros and cons of battery balancing, analyzing its important role in ...

Balancing is achieved through two primary methods: passive balancing, which dissipates excess energy from overcharged cells as heat using resistors, and active balancing, ...

Maker.io Staff Batteries Battery pack management is an often-overlooked topic in DIY projects. Yet it's vital to keep the individual cells in a pack balanced and well-maintained ...

The battery voltage was still 11.9V. I started the engine again while measuring, and this time the voltage briefly rose to 13.4V, as if the battery was charging. But after about 30 ...

Discover the cutting-edge Balance BMS featuring advanced cell balancing technology, comprehensive safety features, and intelligent monitoring capabilities for superior battery ...

This article will aim to present the benefits of active cell balancing and technical approaches that will help you introduce it to your ...

As part of our production-grade Battery Management System (BMS), we developed an intelligent cell balancing framework using NXP ...

As part of our production-grade Battery Management System (BMS), we developed an intelligent cell balancing framework using NXP MC33774 AFE technology to ensure precise ...

The main battery is the one to look at. The secondary battery is only connected to the car by a relay for a fraction of a second during an engine restart from a stop/start event, ...

I've had both batteries replaced (with the correct models), done a 100 mile trip, overnight smart battery charge, charging voltage is fine, system messages cleared but I am ...

This article will aim to present the benefits of active cell balancing and technical approaches that will help you introduce it to your battery management system (BMS).

The low battery charge message relates to the main battery. On vehicles with stop/start systems and intelligent alternators, the vehicle battery is designed to operate at ...

This review contributed valuable insights into the advancements in battery technology for EVs, focusing on enhancing battery longevity and overall performance through ...
