-----

The city's new 140MW photovoltaic + storage project isn't just another solar farm - it's Serbia's first large-scale marriage of solar generation with lithium-ion battery storage.

This venture is set to become one of the United Kingdom's largest battery energy storage systems, with a capacity of 320MW and a whopping 640MWh of energy storage.

As South Africa grapples with load-shedding (we've all played 'fridge roulette' during blackouts, haven't we?), this Free State capital's becoming the poster child for smart ...

Concentrating solar power (CSP), when integrated with thermal energy storage (TES), can address both intermittency and storage needs by providing dispatchable renewable ...

The Mangaung Battery Energy Storage System (BESS) Scheduled for completion in Q3 2025, this 800MWh lithium-ion facility will store enough energy to power 350,000 homes during ...

Enter Bloemfontein's 2025 energy storage tender--a game-changer for South Africa's renewable energy landscape. With rolling blackouts still fresh in memory (thanks, ...

As South Africa's judicial capital, Bloemfontein faces unique energy challenges. With frequent load-shedding and growing renewable energy adoption, energy storage containers have ...

As South Africa's judicial capital seeks reliable power solutions, energy storage systems are becoming the cornerstone of Bloemfontein's renewable energy transition.

It is crucial to integrate energy storage devices within wind power and photovoltaic (PV) stations to

effectively manage the impact of large-scale renewable energy generation on power ...

A 99.9MW energy storage project in development in northern England by Renewable Energy Systems (RES) has secured planning permission, with the asset set to be operational in late ...
