storage is hindering Bulgaria in the development of an energy storage market. Furthermore, Bulgaria's energy legislation and grid codes have been historically written with thermal plants ...

Bulgaria's Ministry of Energy has approved EUR588 million in funding for 82 standalone battery energy storage projects, totaling nearly 9.7GWh of usable capacity. The ...

The latest white paper, prepared by Fluence in collaboration with APSTE, examines the current state of the Bulgarian energy market and the ...

In 2024, GSL ENERGY completed a 7.45 MW battery energy storage system (BESS) in Bulgaria, which is used in conjunction with a ...

Bulgaria is taking bold steps toward a greener energy future, having recently wrapped up its most ambitious ...

Bulgaria has inaugurated a 124 MW / 496.2 MWh battery energy storage system (BESS) in the town of Lovech, described by the Ministry of Energy as the largest such ...

By integrating energy storage, this project captures excess solar power during the day and dispatches it during high-price periods, significantly improving revenue potential. From ...

The storage system is part of the largest hybrid fleet in the EU, including a 106 MW photovoltaic plant. It is connected to Bulgaria's first and only licensed closed distribution network located at ...

Located next to a photovoltaic park within Balkan Industrial Park, it is part of the country's first closed licensed power distribution ...
