-----

To maximize the synergistic potential of jointly scheduling electric vehicles and mobile energy storage systems, this study develops a collaborative scheduling model ...

The paper proposes a day-ahead scheduling framework with a novel multi-stage battery degradation modeling method for an electric ...

Paper 252 Optimal Scheduling Methods for Distributed Energy Storage Systems in Electric Vehicle Charging Networks With the rapid development and widespread adoption of electric ...

To optimize the energy scheduling of integrated photovoltaic-storage-charging stations, improve energy utilization, reduce energy losses, and minimize costs, an optimization ...

This study focuses on designing and optimizing EMS strategies for charging stations to achieve the economic, safe, and efficient operation of the EV charging station with ...

In this paper, we model charging scheduling as a Markov decision process (MDP) based on deep reinforcement learning (DRL) to avoid the afore-mentioned problems. With a ...

To improve the charging station operation economy, an optimal scheduling method of EV charging stations with access to shared energy storage is proposed.

This shows that the optimal scheduling mode of scenario 4 helps to extend the service life of the energy storage equipment and reduce the long-term operation cost of the power station ...

To address these issues, a dual-layer optimization model was constructed and solved using the Golden Sine

Algorithm, balancing the construction cost of CSs and user ...

The paper proposes a day-ahead scheduling framework with a novel multi-stage battery degradation modeling method for an electric vehicle (EV) fast charging station (FCS) ...

To maximize the synergistic potential of jointly scheduling electric vehicles and mobile energy storage systems, this study develops ...

For these purposes, this study presents the power management scheme of interdependent MG and EV fleets aided by a novel EV charging/dis-charging scheduling algorithm.

To address these issues, a dual-layer optimization model was constructed and solved using the Golden Sine Algorithm, balancing the ...
