-----

A new project led by the National Renewable Energy Laboratory (NREL) and funded by the U.S. Department of Energy's (DOE's) Geothermal Technologies Office aims to ...

The researchers at the National Renewable Energy Laboratory are poised to roll out cold underground thermal energy storage, or cold ...

Nostromo Energy's Project IceBrick is a virtual power plant (VPP) that will deploy up to 193 cold thermal energy storage systems at commercial buildings across California.

The project, funded by the US Department of Energy Geothermal Technologies Office, will incorporate geothermal ...

TES systems can improve energy reliability in our nation's building stock, lower utility bills for American consumers and businesses, and protect people during extreme heat and cold ...

In Yunnan, a 1 MW pilot project by State Power Investment Corp uses air to store heat and cold simultaneously. It's like a thermos on steroids, providing 550°C heat, -20°C ...

The project, funded by the US Department of Energy Geothermal Technologies Office, will incorporate geothermal underground thermal energy storage (UTES) technology at ...

The applications of cold storage technologies can effectively reduce the building energy consumption in the buildings and improve the performance of whole system in the air condition ...

Innovative energy concepts for creating a plant with a low carbon footprint were planned, where thermal energy storage technology was indicated as one important factor to ...

This study pioneers the use of TRNSYS for dynamic simulations of hydrate cold storage systems, presenting the first comprehensive annual analysis of their operational ...

A new project led by the National Renewable Energy Laboratory (NREL) and funded by the U.S. Department of Energy's ...

The researchers at the National Renewable Energy Laboratory are poised to roll out cold underground thermal energy storage, or cold UTES, at data center sites around the country.

A new project aims to explore the use of Cold Geothermal Underground Thermal Energy Storage (Cold UTES) technology to cool data centers. The project, led by the National ...
