As a niche application of microgrids, several military base microgrids have been deployed in recent years. Renewable-based microgrids can help the military reduce its petroleum use, ...

We install communication lines to ensure that all communication between the lithium batteries, PCS, air conditioning, diesel generators, and high-voltage transformers is ...

A photovoltaic (PV) solar mini-grid has been installed in Mandelia, Chad and equipped with a distribution line that extends the reach of electricity to communities far from ...

Solar energy is also a clean, renewable power source that reduces greenhouse gas emissions, helping combat climate change. By making the switch, telecom operators can ...

Several telecom operators in Chad are already beginning to see the benefits of adopting solar power. Companies are piloting and expanding their solar-powered telecom sites, reporting ...

Solar energy is also a clean, renewable power source that reduces greenhouse gas emissions, helping combat climate change. By ...

Located in the Dedza district of Malawi near the town of Golomoti, the 20MWac solar PV and 5MW/10MWh energy storage project is set to become a leading project in sub-Saharan Africa ...

Major projects now deploy clusters of 20+ containers creating storage farms with 100+MWh capacity at costs below \$280/kWh. Technological advancements are dramatically improving ...

The Regulatory Authority for Electronic Communications and Postal Services (ARCEP) in Chad is urging
