What incentives does the Department of energy offer?

The Department of Energy (DOE) operates the greatest number of efficiency and renewable energy incentive programs, including RDD&D grants and contracts, weatherization assistance, production incentives, loan guarantees, and technology transfers.

How does the federal government subsidize CCS technology?

The federal government subsidizes the development of CCS technology largely through funding for the Department of Energy; it subsidizes the use of CCS through tax provisions that reduce the cost of capturing and storing CO₂.

Should federal money be spent on CCS?

Federal dollars that are spent on CCS could instead have been used to subsidize further development of clean energy sources and supporting technologies, such as types of energy storage that could reduce or eliminate the concerns about intermittency that are associated with renewable electric power.

Does HUD have a statutory authority to create a power saver?

No statutory authority. HUD developed the PowerSaver as part of the Recovery Through Retrofit initiative launched in May 2009 by the White House Task Force on Middle Class Working Families to develop federal actions for expanding green job opportunities in the United States and boosting energy savings by improving home energy efficiency. 52

Taking advantage of Inflation Reduction Act incentives, such as tax credits, is key to lowering GHG emission footprints and accelerating the clean energy transition. The ...
