What is a 9-in TV media in-wall box with power supply kit?

The 9-in TV media in-wall box with power supply kit is ideal for concealing and organizing media devices and power in wall to create a sleek, finished look. The perfect solution directly behind any wall mounted TV to store streaming devices like Apple TV, Roku, Amazon Fire TV, network switches and more.

What devices can be stored behind a wall mounted TV?

The perfect solution directly behind any wall mounted TV to store streaming devices like Apple TV, Roku, Amazon Fire TV, network switches and more. Featuring an included power supply kit to bring power to TV and other mounted devices.

How does a multimedia outlet system work?

Changes are made without removing the wallplate from the wall, and all wiring and cabling is done from the front side of the wallplate. The Multimedia Outlet System consists of surface-mount boxes and single-, dual, and triple-gang wallplates that accept a variety of copper, fiber, and AV modules.

How do I bring power to my TV and mounted devices?

Bring power to TV and mounted devices with included power kit. Power knockouts allow you to install power for TV and mounted devices. Mounting plate with 1.5" of elevation adds second layer of storage and accommodates larger devices. Cable knockouts help organize and manage cables.

A 20 amp power supply will be more than enough for the MXT500 or any other 50 watt radio as long as you running just one radio. The power draw of the MXT500 is around 12 ...
