-----

The technical data collected before the energy storage station is connected to power grid for testing shall meet the requirements of Annex A. 4.3 Before the energy storage station is ...

NEW RULES! Test regulations for electrochemical energy storage power stations connected to power grids (GB/T 36548-2024) 0

4.8 Unless otherwise specified, the energy storage station shall be pre-charged or pre-discharged before testing, and the energy state should be 30% to 80% of the rated discharge energy.

This standard specifies the test conditions, test equipment, test items and methods for electrochemical energy storage system connected to power grid.

GB/T 36548-2024: Test code for electrochemical energy storage station connected to power grid

Find the most up-to-date version of GB/T 36548-2018 at GlobalSpec.

The calculation method is shown in Formula (1) and Formula (2). i) Repeat steps c) ~ h) twice and record the rated charging energy  $E_{rc2}$  and  $E_{rc3}$  of the energy storage station, and the rated ...

4.1 The test results of the energy storage station connected to power grid shall be judged according to the requirements of GB/T 36547 and GB/T 43526.

This document is applicable to the commissioning, grid connection detection, operation and maintenance of newly constructed, renovated and expanded electrochemical energy storage ...
