-----

Eolus is developing a stand-alone battery energy storage project in Los Angeles, California

Giving people better data about their energy use, plus some coaching, can help them substantially reduce their consumption and costs, according to a study by MIT ...

The installation would be the Canadian company's first grid-scale deployment of its "advanced compressed-air energy storage" technology.

AES" Luna Storage and LAB are energy storage projects located in California. We are committed to responsible clean energy development ...

Unlocking its secrets could thus enable advances in efficient energy production, electronics cooling, water desalination, medical diagnostics, and more. "Boiling is important for ...

One of the US"s largest solar + battery storage projects is now fully online in Mojave, California.

MIT researchers developed a new fabrication method that could enable them to stack multiple active components, like transistors and memory units, on top of an existing ...

AES" Luna Storage and LAB are energy storage projects located in California. We are committed to responsible clean energy development that creates long-term value and positive impact for ...

The new Schmidt Laboratory for Materials in Nuclear Technologies (LMNT) at the MIT Plasma Science and Fusion Center accelerates fusion materials testing using cyclotron ...

MIT engineers developed a membrane that filters the components of crude oil by their molecular size, an

advance that could dramatically reduce the amount of energy needed ...

Growing energy demand means the U.S. will almost certainly have to expand its electricity grid in coming years. What's the best way to do this? A new study by MIT ...

This project is possible through a collaboration between LADWP and Arevon Energy, Inc., the developer, owner and operator of Eland, to procure the power produced from ...

Liquid air energy storage could be the lowest-cost solution for ensuring a reliable power supply on a future grid dominated by carbon-free yet intermittent energy sources, ...

The MIT Energy Initiative's annual research spring symposium explored artificial intelligence as both a problem and solution for the clean energy transition.

By pairing utility-scale solar with advanced energy storage technology, Eland delivers low-cost electricity to meet LA's growing energy needs -- including when demand ...

By delivering highly engineered Energy Storage solutions, RWE manages grid stability, reduces renewable curtailment, and provides Distributed Energy Resources (DERs) to better align ...
