The APV concept is a form of renewable energy-related technology that is a mixed hybrid system that deploys photovoltaic panels over a unit area of land while minimizing land demand.

The Gambia is embracing solar energy and green hydrogen - aiming for a 50% renewables share by 2030 - supported by international partners and investment.

This study aims to elucidate the techno-economic benefits of augmenting photovoltaic mini-grids with the overarching goal of advocating for the adoption of photovoltaic ...

Solar-powered water pumping systems are revolutionizing agriculture and water access in rural Africa. These systems use photovoltaic panels to power pumps that draw water ...

By empowering rural villages, it's turning the tide on energy poverty with groundbreaking green projects. This article takes you on a journey through these vibrant ...

A variety of businesses, institutions and enterprises in The Gambia would benefit from investment into the solar energy sector. The Gambia also ...

Rural communities across Africa are experiencing a revolutionary approach to energy access through pay-as-you-go (PAYG) solar systems. These innovative off-grid ...

A significant strategic project with strong substantial economic and social impacts, the recently inaugurated solar photovoltaic plant in ...
