Do you finance solar & storage projects?

We finance both solar plus storage projects as well as standalone storage projects. We know the asset class and can provide value with long-term, project-level debt. Our solar lending team members are experts in utility-scale and C&I solar, community solar and energy storage project financing nationwide.

What is livestock finance & how does it work?

Livestock finance removes fiscal uncertainty and allows farmers to grow their business according to a plan. Livestock finance falls into two main categories: Short-term farm loans to cover seasonal cashflow dips. Use them to pay for almost any farm expense - animals, wages, fuel, feed, vets, energy, etc. Pay the loan back over 1 -7 years.

What is cow and livestock finance?

Fortunately, this is where cow and livestock finance can help - fast, affordable loans to meet working capital needs, or pay for large-scale investments such as milking sheds, feed processors, and vehicles. Read on to discover more about this agricultural funding and to find the best livestock finance for your farm. What is livestock finance?

Why should farmers consider livestock finance?

Some loans require no security (collateral), while some may require a charge over land, buildings, or other capital assets. Farmers should consider livestock finance for the following reasons: To increase revenues from livestock expansion or more efficient animal processing. To offset seasonal cashflow shortfalls.
