Neptunus on kauimpana aurinkokunnassamme. (Neptune is the farthest in our solar system.) Fun Facts about Finnish Planetary Names The Finnish language tends to adopt Latin-based ...

The center of the scale model, the Sun, is located at the top of the Patterinm&#228;ki in Pajam&#228;ki, at the top of a 20-meter pole. It is made of steel pipes, and its diameter is 1.4 meters. The planets are placed on concrete posts so that their distances to the sun are in scale. The sizes of the planets are also in scale: e.g. the size of Mercury is only 4.9 millimeters. There are explanatory texts on the model and the planets near the models in special tables. The texts are in Finnish, Swedish and English

Engage children with colorful, printable Aurinkokunta flashcards in finnish. Ideal for ESL, homeschooling, and preschool activities.

The Pajam&#228;ki Solar System Scale Model is a scale model of the Solar System built in Helsinki and partly in Espoo, Finland in 1992. Its scale is 1:1 000 000 000, i.e. one to one billion, so that ...
