Resources to assist fire departments with risks, response and community outreach materials related to lithium-ion battery incidents.

Lithium-ion (Li-ion) battery technology is commonly used for stationary grid scale BESS and poses inherent fire safety hazards due to ...

FFS Active Wildfire Points are interactive maps that provide a list of the current reported and active wildfires in Florida. FFS County-Enacted Burn Ban Map: This map reflects the county ...

Keep an eye on wildfire activity with the Frontline live fire map. Download the wildfire tracker for customized wildfire alerts.

The scope of this document covers the fire safety aspects of lithium-ion (Li-ion) batteries and Energy Storage Systems (ESS) in industrial and commercial applications with the primary ...

This page provides live weather information of active fire incidents as an interactive map. It also provides predicted smoke fallout from each fire, as well as live air quality data.

It provides a public resource of information to best prepare and manage wildfire season. Developed in a joint partnership between the EPA and USFS.

Global fire map and data. NASA | LANCE | Fire Information for Resource Management System provides near real-time active fire data from MODIS and VIIRS to meet ...

Fire prevention of lithium-ion batteries for solar container communication stations in winter

This comprehensive guide empowers users to implement informed, effective fire protection strategies, ensuring safety and ...

Track the latest wildfire and smoke information with data that is updated hourly based upon input from several incident and intelligence sources.

Based on the analysis of the thermal safety issues for preventing possible TRs and for extinguishing an already uncontrollable fire, a complete set of solutions for the thermal ...

Track wildfires & smoke across the US. Monitor fire spread, intensity, and lightning strikes. Stay informed with real-time updates on Map of Fire.

Fire data is available for download or can be viewed through a map interface. Users can subscribe to email alerts bases on their area of interest.

Against this backdrop, a large number of scholars and researchers have conducted in-depth studies on safety risk prevention and control technologies for lithium battery energy ...

Lithium-ion (Li-ion) battery technology is commonly used for stationary grid scale BESS and poses inherent fire safety hazards due to li-ion battery failure.

Firstly, understanding the risks and potential causes of Lithium-ion fires is crucial to fighting them. With this in mind, Firechief has laid out an eight-step plan. Step one is to ...
