The Gambia Solar Energy Project - Initiated in 2007 and completed in 2012, this project was implemented by the University of Strathclyde's ...

Energy demand in The Gambia has increased by 5.5% per year in recent years and today's connection of the new 23 MWp solar plant to the national energy grid will significantly increase ...

Discover The Gambia's journey towards sustainable energy independence, from the inauguration of its first large-scale solar facility to ...

The Gambia currently has an installed power generation capacity of over 100 MW, yet only generates around 40 MW and faces ...

The Gambia currently has an installed power generation capacity of over 100 MW, yet only generates around 40 MW and faces demand exceeding 50 MW. To address this, the ...

Gambia's National Water and Electricity Company (NAWEC) is making significant strides in its ambitious solar expansion project. Central to this initiative is the installation of a ...

SummaryLocationOverviewDevelopersConstruction costs, funding, and commissioningThe Jambur Solar Power Station (JSPS), is an operational 23 MW (31,000 hp) solar power plant in Gambia. The power station began commercial operations in March 2024. It is owned and was developed by the government of Gambia, with funding from the European Union, the European Investment Bank and the World Bank. The power generated here is integrated into the Gambian national electricity grid, through the National Water and Electricity Company network.

Discover The Gambia's journey towards sustainable energy independence, from the inauguration of its first

large-scale solar facility to the exploration of green hydrogen.

Together, the two facilities provide new or improved electricity to 500,000 people. Electricity produced from the solar park has reduced the Central African Republic's dependence on ...

On Saturday, at a historic occasion in the Community of Kombo Jambur, President Barrow led the official inauguration ceremony of the now completed 23 Megawatt Solar Plant ...

On Saturday, at a historic occasion in the Community of Kombo Jambur, President Barrow led the official inauguration ceremony ...

The power station began commercial operations in March 2024. It is owned and was developed by the government of Gambia, with funding from the European Union, the European ...

The Gambia Solar Energy Project - Initiated in 2007 and completed in 2012, this project was implemented by the University of Strathclyde's Department of Electronic and Electrical ...
