Is insulated glass a good choice for a sunroom?

Comprised of two panes of glass,insulated glass is a popular choicefor extending the seasonal use of your sunroom. It will also improve your heating and cooling performance over single-pane glass.

What type of glass is used in a sunroom?

The glass used in the sunroom can be any industry available glass. Laminated glass is typically used in the roof. Upon impact,such as a falling tree,the glass will crack but should not break,leak,or fall on a bystander. LowE glazings can be used in the roof and walls. This is a very sensible glass for home owners.

Where can solar glazed buildings be used?

Solar's glazed structures can be directly on the ground or atop high rise buildings. Restaurants,hospitals,and retirement homes can all benefit from the additional natural light provided by the implementation of a glazed room.

Are solar glazed structures a good choice?

Solar's glazed structures are constructed from durable aluminum framework and the HVHZ certifications speak to the strength engineered into every structure solar produces. Though preferential in many commercial applications,an all-aluminum structure is not always ideal for a residence.
