-----  
What is Algeria doing with solar energy?

Building on the Solar 2,000 MW and Solar 1,000 MW programs launched by Algeria's state-owned company Sonelgaz, which include a wide range of solar energy initiatives, the government aims to diversify its revenue streams and reduce reliance on natural gas, which is currently primarily used for power generation in the country.

How many solar PV plants are there in Algeria?

The first component is a 2,000MW project that encompasses the construction of 15 solar PV plants across 12 provinces, with individual capacities ranging from 80MW to 220MW. Have you read? Meanwhile, the Solar 1,000MW Project entails the construction of five plants across five Algerian provinces, with capacities ranging from 50MW to 300MW each.

How many solar panels does Algeria have?

Algeria already has three solar panel facilities totaling 260 MW of annual solar panel production capacity (about 40 percent of which became operational in 2020). The road ahead Algeria is making notable progress in the development of its renewable energy sector, yet challenges remain.

What is Algeria's first photovoltaic project?

Among them, the 233-megawatt photovoltaic project completed in 2016 was Algeria's first new energy project and also the first large-scale grid-connected photovoltaic power station project in Africa. It was honored with the Luban Prize for Overseas Projects in 2018-2019.

Among the crucial steps involved in sizing a photovoltaic system, one integral part is the assessment of solar potential. It refers to the capacity of a region to harness solar energy, ...

With these two waves of solar power plants, Algeria is hoping to catch up with its neighbours in the North

African sub-region, who have the same solar potential.

The solar program will be executed in phases. It is designed to increase the share of renewable energy in Algeria's electricity ...

The state owned utility for electricity and natural gas distribution in Algeria has signed 19 contracts with local and international companies to construct solar PV plants.

Over these years, POWERCHINA has undertaken a total of 26 projects in Algeria, covering a wide range of areas including dams, irrigation, municipal infrastructure, civil engineering, grain ...

A Chinese consortium comprising China International Water & Electric Corporation (CWE) and China Nuclear Industry Huaxing ...

The state owned utility for electricity and natural gas distribution in Algeria has signed 19 contracts with local and international ...

Over these years, POWERCHINA has undertaken a total of 26 projects in Algeria, covering a wide range of areas including dams, irrigation, ...

A Chinese consortium comprising China International Water & Electric Corporation (CWE) and China Nuclear Industry Huaxing Construction (HXCC) began constructing five ...

Our dataset for Solar Photovoltaic Power Plants in Algeria is one of the most comprehensive in the industry. As of July, 2025, we have compiled data on 33 verified listings.

Data and information about Solar power plants and their location plotted on an interactive map of Algeria.

The most important key figures provide you with a compact summary of the topic of "Renewable energy in Algeria "; and take you straight to the corresponding statistics.

Get to know the projects' power generation capacities in MWp or MWAC, annual power output in GWh, state of location and exact location on the map, name of developer, year of connection ...

With these two waves of solar power plants, Algeria is hoping to catch up with its neighbours in the North African sub-region, who have ...

The solar program will be executed in phases. It is designed to increase the share of renewable energy in Algeria's electricity production. The new plants will contribute to the ...
