How much does a 5G base station cost?

Setting up a 5G base station is expensive, with costs ranging from \$100,000 to \$200,000 per site. This price includes hardware, installation, site rental, and maintenance. Urban areas often have higher costs due to land prices and infrastructure challenges.

How big is the 5G base station equipment market?

The 5G base station equipment market is estimated to reach US\$52.733 billion by 2030 from US\$29.865 billion in 2025, growing at a CAGR of 12.04%. 5G base stations form the backbone of next-generation wireless networks, enabling enhanced bandwidth, ultra-low latency, and broader coverage to support rising connectivity demands.

How will 5G impact Southeast Asia in 2025?

By 2025, 5G will make up 14% of all mobile connections in Asia-Pacific, rising from 200 million in 2021 to 430 million. In Southeast Asia alone, subscriptions are set to increase at a CAGR of 67%, a pace that reflects both rising demand and aggressive rollout strategies. How much does SA 5G cost?

However, transitioning from non-standalone (NSA) 5G to SA 5G comes with a hefty price tag--between \$1 billion and \$3 billion per operator. Unlike NSA 5G, which relies on existing 4G infrastructure, SA 5G requires a brand-new core network. This includes cloud-based architecture, advanced data centers, and software-defined networking.

The Asia Pacific 5G base station market was valued at US\$ 7.54 billion in 2022 and is expected to reach US\$ 25.74 billion by 2030; it is estimated to register a CAGR of 16.6% from 2022 to ...
