-----  
Does Huawei have a role in China's Semiconductor supply chain?

With Huawei quietly present across the Chinese semiconductor supply chain and its role serving national, military, and strategic goals, it is becoming ever more difficult to ensure that products delivered to China are not diverted to the military or other restricted end uses.

Will Huawei become a chip-making powerhouse?

New restrictions on semiconductor exports to China are scrambling sales and fueling concerns that the Chinese tech giant will become a chip-making powerhouse. American chip companies worry Huawei could become a major rival for A.I. chips. Aly Song/Reuters Tripp Mickle reports on the chip industry from San Francisco.

Can Huawei fill a void left by US export restrictions?

These new chips are poised to fill a void left by U.S. export restrictions that have curbed China's access to top-tier AI accelerators from U.S. firms like Nvidia. Huawei's move not only underscores China's determination to forge ahead in semiconductor self-reliance, but also foreshadows a potential reordering of the global AI supply chain.

Why is Huawei launching a high-end AI chip?

Huawei's push into high-end AI chips is occurring against the backdrop of an intensifying tech "cold war" between the United States and China. Washington has imposed successive rounds of export controls to limit China's access to cutting-edge semiconductors, citing national security concerns.

According to sources cited by Reuters, Huawei will begin mass shipments of its Ascend 910C AI chip to Chinese customers as early as May. Initial deliveries have reportedly ...

With the U.S. restricting China from buying advanced semiconductors used in artificial intelligence development, Beijing is ...

Huawei announced plans to release the Atlas 950 and 960 superpods over the next two years. Dozens of the "SuperPoDs," as Huawei brands them, could be connected to ...

Huawei benefited from import substitution to build up a homegrown information and communication technology (ICT) industry, transforming it into a national champion in this space.

With the U.S. restricting China from buying advanced semiconductors used in artificial intelligence development, Beijing is placing hopes on domestic alternatives such as ...

According to sources cited by Reuters, Huawei will begin mass shipments of its Ascend 910C AI chip to Chinese customers as ...

Huawei's approaches have not produced any deals, but discussions with Saudi Arabia are at an "advanced" stage, with the kingdom reportedly signalling an openness to ...

Executive Summary On December 8, the Trump administration announced plans to loosen U.S. export controls on artificial intelligence (AI) chips to China by approving the sale of ...

Huawei Technologies Co.'s key partners are showcasing products from software to chip gear after US President Donald Trump threatened more curbs on China's access to ...

Mr. Huang's message spoke to one of his biggest fears. For years, he has worried that Huawei, China's telecommunications giant, will become a major competitor in A.I.

Mr. Huang's message spoke to one of his biggest fears. For years, he has worried that Huawei, China's telecommunications giant, will ...

Huawei's approaches have not produced any deals, but discussions with Saudi Arabia are at an "advanced" stage, with the ...

In addition, Huawei plans to roll out new computing power supernodes that allow chips to interconnect at high speeds. Nodes can be ...

Looking to develop advanced domestic chip-related companies, Chinese semiconductor equipment vendor Huawei has invested in more than 60 homegrown Chinese ...

In addition, Huawei plans to roll out new computing power supernodes that allow chips to interconnect at high speeds. Nodes can be described as a rack system that contains ...
