How will Hungary's subsidy scheme affect battery energy storage?

The Hungary panel discussion at the event. Image: Solar Media. Hungary's subsidy scheme for energy storage will drive huge growth in battery energy storage system (BESS) deployments over the next few years.

Is Hungary a good market for energy storage subsidies?

Moderator Nikita Chandrashekar, director at advisory Augusta & Co, said the scheme made Hungary an attractive market: "It is probably one of the most advanced subsidies schemes to bring energy storage forward. So from a revenue perspective, perhaps, unlike some other markets, the business case in Hungary seems pretty well developed."

How much power does Hungary have?

Hungary has 40MWh of grid-scale BESS online today but that will jump 3,400% to around 1,300MWh over the next few years thanks to opex and capex support from the government, said P&#225;lma Szolnoki, senior research associate at trade body the Hungarian Battery Alliance.

Will the Energy Storage Summit Central Eastern Europe be a cannibalisation event?

Szolnoki agreed, saying that cannibalisation was much further away. The Energy Storage Summit Central Eastern Europe is set to return in September 2025 for its third edition, focusing on regional markets and the unique opportunities they present.

This event will bring together key stakeholders from across the region to explore the latest trends in energy storage, with a focus on ...

On 21 June 2023, the European Commission approved with the decision SA.102428 a Hungarian state aid scheme to support energy storage facilities for the integration of weather-variable ...

Hungary's newly announced residential energy storage support program, launching in early 2026, marks a decisive step in empowering households to take control of ...

Summary: Discover how Hungary's strategic hub in Pecs is revolutionizing energy storage exports. This article explores industry applications, market trends, and why European-made ...

This report provides an initial insight into various energy storage technologies, continuing with an in-depth techno-economic analysis of the most suitable technologies for Finnish conditions, ...

Hungary is aiming to support the installation of at least 800MW/1,600MWh of new energy storage projects through the scheme. The projects will help to integrate new renewable energy ...

Hungary's city of Pecs has quietly emerged as a hotspot for household energy storage manufacturing. With rising demand for renewable energy solutions, factories here are driving ...

Summary: This article explores how cutting-edge energy storage systems are transforming the Pecs power grid in Hungary. We'll analyze their role in grid stabilization, renewable energy ...

This event will bring together key stakeholders from across the region to explore the latest trends in energy storage, with a focus on the increasing integration of energy storage ...

The new facilities will be fully integrated in the national grid, and are expected to double the current integrated storage capacity to a total of 146 MWh. The ministry also said ...
