What is a solarcontainer?

The Solarcontainer is a photovoltaic power plant that was specially developed as a mobile power generator with collapsible PV modules as a mobile solar system, a grid-independent solution represents. Solar panels lay flat on the ground. This position ensures maximum energy harvest. Panels lay flat on the ground.

Why should you choose a modular solar power container?

Go big with our modular design for easy additional solar power capacity. Customize your container according to various configurations, power outputs, and storage capacity according to your needs. Lower your environmental impact and achieve sustainability objectives by using clean, renewable solar energy.

Can a solar-powered refrigerated container help fight food waste?

That's it! The solar-powered refrigerated container has the power to fight food waste while providing cold storage for vaccine, blood, or medicine all through commercial cold storage. Off-grid refrigeration can be valuable for humanitarian organizations and governments.

How many households can a solar Container Supply?

Based on an average power consumption of a 4-person household of 4000 kWh per year and a location in Southern Germany, the solar container can supply approx. 32 households with climate-friendly electricity. At a location in Southern Europe it can even be up to 50 households due to the high solar radiation.

Our solar-powered ice maker, available in flake or block ice configurations, provides continuous ice production and storage 24/7. It is a versatile solution for businesses in the agriculture, ...

Since then, we've perfected our engineering and manufacturing process resulting in a durable, energy efficient, containerized medical solution which has helped increase ...
