Intelligent LCD UPS systems from CyberPower are designed with line interactive or standby topology and offer guaranteed power protection for desktop computers, workstations, routers, ...

Even brief power outages can result in data loss or potential hardware damage. A UPS system provides battery backup power to keep your devices running during short outages and ...

The OpenUPS2 was designed to provide user specified regulated power output from a wide input voltage or battery backup, microprocessor assisted LiFePO4 battery charging and cell ...

Provides a manufactured waveform output to supply cost-effective battery backup power for equipment that does not require sine wave output. This model is an ENERGY STAR[®] certified ...

This mini-tower power supply offers ten outlets that are capable of absorbing up to 1,080 Joules for keeping your devices safe against surges and spikes. To keep your devices powered ...

Our innovative lithium powered Double-Conversion UPS solutions are designed with ease and efficiency in mind, allowing you to effortlessly connect multiple units and battery packs to ...

A mini-tower UPS with line interactive topology, the CyberPower Intelligent LCD CP1500AVRLCD provides battery backup (using simulated sine wave output) and surge protection for desktop ...

An uninterruptible power supply, or UPS, is basically a surge protector, battery, and power inverter -- which turns the battery's stored energy into usable power -- in one.

A mini-tower UPS with line interactive topology, the CyberPower Intelligent LCD CP1500AVRLCD provides battery backup (using simulated sine wave output) and surge ...

The CyberPower Intelligent LCD LE1000DG is a compact Battery Backup/ UPS (uninterruptible power supply) with line interactive topology. This model provides battery power and surge ...
