-----

While the energy storage pipeline in Ireland remains strong, it is unlikely to see a similar growth in built capacities until a few years from ...

While Ireland currently relies primarily on battery storage and the Turlough Hill Power Station in County ...

Wind and solar energy play a key role in Ireland's transition from fossil-fuel-based electricity generation. But these precious resources will need to be stored for times when the ...

Today's conference heard from a range of stakeholders across the renewable sector, discussing the potential role of energy storage in the Irish energy transition, and the ...

What value can storage deliver on the road to decarbonisation, and how can this be achieved? The Irish Single Electricity Market (SEM) faces significant challenges if it is to ...

Siemens Energy will deliver the first-ever hybrid grid stabilization and large-scale battery storage plant at Shannonbridge in Ireland. This is the first time, these two technologies ...

While Ireland currently relies primarily on battery storage and the Turlough Hill Power Station in County Wicklow, new technologies are emerging that could play a key role in ...

To achieve a decarbonised energy sector a cost-effective means for the long-term storage of large volumes of renewable energy will be required. ...

Wind and solar energy play a key role in Ireland's transition from fossil-fuel-based electricity generation. But these precious resources ...

While the energy storage pipeline in Ireland remains strong, it is unlikely to see a similar growth in built capacities until a few years from now. The potential cut-backs in DS3 ...

Exploring Ireland's renewable energy transition, focusing on cutting-edge storage technologies and catalytic innovations powering the path to net-zero.

To achieve a decarbonised energy sector a cost-effective means for the long-term storage of large volumes of renewable energy will be required. Technologies such as pumped hydro, ...

As opposed to short duration storage that mainly provides system services, LDES allows for storing and dispatching energy on-demand rather than letting surplus renewable energy go to ...

Energy Storage Ireland, the industry body representing the energy storage sector in Ireland, has called on the Irish grid operator EirGrid to deliver the government's target of 500 ...
