-----  
What is 5G & how will it impact Angola?

With a download speed of over 1 gigabit per second (gbps), the technology promises to transform the experience of mobile users and dramatically improve efficiency in digitally connected industries in Angola. Africell Angola's 5G network was activated at the FILDA trade fair in Luanda on 16 July 2022.

Why is Africell launching 5G in Angola?

The activation of Africell's 5G network in Angola positions Angola as a regional leader in advanced telecommunications technologies. Africell's 5G network in Angola has been activated for the first time, making Angola a leader in sub-Saharan Africa in terms of 5G connectivity.

Why is Angola Cables launching a Luanda data center?

In fact, Angola Cables has been expanding data center capacity (the AngoNAP Luanda facility) and positioning Luanda as a connectivity hub between Africa and South America- an attractive proposition for global cloud and tech companies to cache content or route traffic via Angola.

What percentage of Luanda is covered by 3G?

3G coverage reaches about 90-92% of the population; 4G coverage was around 34% in 2023 with targets of 48% by end-2023 and 85% by 2027, while 5G launched commercially in December 2022 in central Luanda and had ~2% of the population covered by late 2024.
