How many battery storage projects will Stonepeak and CHC develop in Japan?

Stonepeak and CHC's energy storage platform will develop five new battery storage projects in Japan. These projects have a combined capacity of 348 megawatts (MW). The deals were finalized under Japan's Long-term Decarbonization Auction. These projects were selected as part of Japan's latest long-term auction focused on low-carbon energy.

Why are battery storage projects growing in Japan?

The ramp up of battery storage projects in Japan continues apace, aided by growing subsidy avenues and rising volumes on various electricity markets, from spot to balancing to capacity.

Could Japan unlock a battery boom?

Taiwanese analyst InfoLink Consulting has said Japan could unlock a battery boom if it resolves a regulatory ambiguity, overcomes urban density issues, and harmonizes a national grid which operates on different frequencies in two halves of the nation.

What projects are being done in Japan?

Other projects in Japan include a municipal BESS project in Iida City, Nagano Prefecture. This small-scale system, with an installed capacity of 2 MW/4 MWh, is operated by a city-owned energy company. It is used to stabilize power from local solar panels and support community resilience.

Domestic giants Toyota, Nissan, and Panasonic have committed more than JPY 1 trillion (\$6.9 billion) between them to raising Japan's annual battery manufacturing capacity ...

Tokyo, 12 June 2025 - Saft, a subsidiary of TotalEnergies, has been selected by leading Asian renewable energy developer Gurin Energy to supply a battery energy storage system (BESS) ...

Japan's Energy Transition Drives BESS Growth as Consumption Declines & Renewables Rise Despite

decreasing energy consumption across business, household, and ...

Japan's Energy Transition Drives BESS Growth as Consumption Declines & Renewables Rise Despite decreasing energy ...

Japan's largest renewable battery energy storage system (BESS) project has broken ground in Kyushu spearheaded by developers, Osaka Gas and Sonnedix. The ...

Domestic giants Toyota, Nissan, and Panasonic have committed more than JPY 1 trillion (\$6.9 billion) between them to raising ...

JPN ENERGY Integrated System commissioned its first grid-scale battery storage facility and established Kirishima Chikudensho LLC, a joint venture with GreenEnergy& Co and ...

JPN ENERGY Integrated System commissioned its first grid-scale battery storage facility and established Kirishima Chikudensho LLC, ...

Stonepeak and CHC's energy storage platform will develop five new battery storage projects in Japan. These projects have a combined capacity.

For Eku Energy, the LTDA is important to the business model of its Japanese projects but the developer, perhaps best known for projects in the UK and Australia, sees ...

By 2030, official estimates show variable renewable energy reaching 20% of Japan's power mix. Noting the demand case and ever-growing renewables curtailment ...

By 2025, adoption of lithium-ion battery packs in Japan is expected to accelerate, driven by government incentives, technological advancements, and increasing demand for ...

For Eku Energy, the LTDA is important to the business model of its Japanese projects but the developer, perhaps best known for ...

By 2030, official estimates show variable renewable energy reaching 20% of Japan's power mix. Noting the demand case and ever ...

Listed below are the five largest energy storage projects by capacity in Japan, according to GlobalData's power database. GlobalData uses proprietary data and analytics to ...
