Does Kosovo need a lignite power plant?

Kosovo, rich in lignite coal reserves, relies on outdated Yugoslav-era power plants that cannot meet its increasing energy demands. The 2023 National Energy Strategy aims to raise renewable energy to 35% of the energy mix, reduce greenhouse gas emissions by 32%, and phase out a lignite-fired power unit by 2031.

How did Kosovo get its own energy system?

Kosovo was part of the Regional Energy Community and was connected with the regional system through interconnections with Serbia, North Macedonia, Montenegro and Albania. KOSTT made an agreement with ENTSO-Eso Kosovo gets his own independent region of energy administration. Kosovo gets full independence and control of its energy industry.

What is the energy strategy for Kosovo?

The Kosovo energy strategy includes increasing RES capacity to 35% of electricity consumption by 2031. Aiming for 600 MW wind, 600 MW solar PV, 20 MW biomass & at least 100 MW of prosumer capacity, to reach a total installed RES capacity of 1600 MW by 2031. Lignite exploitation in Kosovo started in 1922.

Does Kosovo need a power plant?

Kosovo has one of the world's largest lignite-coal reserves and it remains dependent on two depreciated and inefficient Yugoslav-era power plants which do not meet Kosovo's energy needs.

The new publicly owned enterprise "Energy Storage Corporation (ESC)" will operate as a joint-stock company with the ...

Kosovo intends to build the first battery energy storage system (BESS) in the region, which will have 170 MW of capacity and come online in 2028, a senior government policy advisor told ...
