What is a containerised generator?

With sound proofing by means of the acoustic lined container that is both lockable and weather proof - these are usually installed outside a building in a car park or outside the intake room. Containerised generators are usually larger generators above 500kVA and upward, and are 80dbA @1 metres noise level. We can make these even more silent.

Why should you choose a containerised generator?

Fire Detection Panels and Intruder Alarms: Enhanced safety and security. Our containerised generators are suitable for a wide range of applications, including: Super Silent: Super silent 65dBA at 1m for prime power running diesel and gas. Critical Backup Power: For MOD, NHS, and HMP sites, ensuring reliable performance in emergencies.

Are CPs generator containers controlled by DSE?

Our generators are coupled with Mecc Alte, Stamford, or Leroy Somer alternators and controlled via DSE or ComAp control panels to ensure top-notch performance. Why Choose CPS Generator Containers?

We specialise in offering high-quality bespoke containerised generators from 110kW to 3.5MW for Diesel, LPG, CHP, and NG Gas application
