Publication does not imply endorsement of views by the World Economic Forum. To keep up with the Agenda subscribe to our weekly newsletter. Author: Christine Mungai is a ...

As part of Dar's commitment to sustainability, the company has successfully commissioned a 100 kWac solar photovoltaic system at the ...

The World Economic Forum is an independent international organization committed to improving the state of the world by engaging business, political, academic and ...

It includes approximately one Gigawatt of utility-scale solar power generation, battery storage, distribution infrastructure, and an ...

Designing solar storage systems for Luanda requires technical expertise and local understanding. From heat-resistant batteries to smart grid interfaces, every detail matters in creating reliable, ...

The following map shows the Atlas of the solar resource in Angola as well as the various locations identified with a significant potential for installing ...

Luanda is the most expensive city in the world, according to one cost-of-living ranking. While it still has immense potential for further development of its natural resources, ...

Discover how the millions of small businesses worldwide can play a pivotal role in tackling the global jobs crisis if they receive the right support.

When Angola wanted to strengthen their national electricity system, diversify their energy matrix, and reduce their dependence on fossil fuels, they turned to Sun Africa. The result is the ...

Check out the solutions for unemployment especially when it comes to the youth. Here are 5 ways that can help tackle youth job crisis

The projects will be installed in the Moxico, Lunda Norte, Lunda Sul, Bie, and Malanje provinces, adding 296 MW of solar capacity and 719 MWh of battery energy storage ...

When Angola wanted to strengthen their national electricity system, diversify their energy matrix, and reduce their dependence on fossil fuels, they ...

Luanda, Angola, will join the list thanks to its rapidly growing population, which is expected to increase by 60% between 2017 and 2030.

Power Your Home With Clean Solar Energy? We are a premier solar development, engineering, procurement and construction firm.

Luanda is expected to undergo a 60% increase in its population between 2017 and 2030, placing further strain on housing, transport, public utilities and sanitation. The Lagos ...

The new system, featuring 12 parallel-connected groups of solar panels, will lower electricity costs, decrease diesel consumption, and reduce CO2 emissions by 478 tons annually.
