-----

Explore how the Middle East is accelerating its role in the global energy transition by localizing solar PV manufacturing. This paper ...

Solar energy in the MENA region is gaining momentum, with policy reforms, giga-scale projects, and digitalisation driving ...

After a series of rigorous laboratory tests, the results confirm that Jinko Solar panels meet all safety standards, demonstrating their reliability in high-safety installations and fire ...

MESIA is the only non-profit solar association in MENA, uniting industry leaders and supporting solar growth through reports, ...

The 2024 MESIA Solar Outlook Report serves as a roadmap for policymakers, industry stakeholders, and investors, highlighting the opportunities and challenges associated ...

The International Energy Agency (IEA) reports that solar PV, together with wind, could account for 95% of global renewable expansion by 2028.

With this jury panel, the MESIA Solar Awards Ceremony 2026 reinforces its position as a benchmark for recognising projects and organisations that are not only delivering ...

Our “Middle East solar PV outlook 2024” is a 40+ slide in-depth report which covers the key market drivers and challenges for utility-scale, C& I and residential solar ...

With strategic investments, cutting-edge innovations, and progressive policies, the Middle East is transforming into a global solar ...

It projects that MENA's solar capacity hit 24 GW (AC) in 2024, which would represent a 25% year-on-year increase. The report said that ...

Through its participation in events like the NX Solar Forum, LONGi continues to lead the industry with innovative technologies, strategic partnerships, and a steadfast ...

By combining photovoltaic systems with vegetation, not only is the stability of the solar power generation system improved, but the microclimate of the area is also significantly ...

The performance of different types of solar panels and individual components were tested (see first photo below). Now the University is proceeding with simulations, in order to ...

With a proven track record in manufacturing, logistics, and installation of PV mounting and tracker systems, JZNEE is poised to contribute to the success of this ...

MESIA was created when a group of solar pioneers came together with the aim of giving life to the vast potential for solar in the Middle East. The group was led by Vahid Fotuhi from BP Solar ...

Siemens Solar has developed specialized PV systems to thrive in the Middle East's harsh environment. Our panels, such as the SP ...
