Should a fire and EMS Station serve as a model?

In each of these areas, the fire and EMS station should serve as the model for the community. As with any public or private facility, fire and emergency services stations are subject to theft, vandalism and violence. For staffed stations, these acts are most likely to occur when emergency response personnel are on a call.

What products does Monaco offer?

Monaco offers a full line of Fire Alarm, Mass Notification, Annunciation Devices, Control Panels and Devices (Addressable and Conventional), and Central Receiving Systems. Please download our 2025 Monaco Products Catalog (174mb) which includes cut-sheets for our offerings. Please note, this catalog may be updated periodically without notice.

Do EMS stations need a specific space?

Carve out specific spaces for specific uses. Of course any EMS station needs adequate sleeping quarters, bathroom facilities and locker/changing rooms for both men and women - but consider what other activities happen at your station that you may not currently have a specific place for.

What is the design and construction of a fire and emergency services station?

The design and construction of a fire and emergency services station is a long and complicated process. Many different decisions are required, and different people may be involved in those decisions. The factors governing facility design vary from department to department, and even within the organization itself.
