How does Montenegro utilize its hydro power?

Montenegro currently uses only approximately 20 percent of its hydro power potential. To fully develop this sector, Montenegro needs to upgrade its transmission and distribution network. The most important development project in the transmission system was the construction of an underwater electricity cable to transport the power to and from Italy. Montenegro will need to continue investing in its hydro power infrastructure to increase its usage and export capabilities.

How much electricity is produced in Montenegro in 2021?

In 2021, Montenegro produced 3,160 GWh of electricity. The majority of this electricity was produced at the Pljevlja coal-fired Thermal Power Plant as well as the Perucica and Piva Hydropower Plants.

Is Montenegro open to foreign trade?

Montenegro is a small country open to foreign trade, which represents around 119% of its GDP (World Bank, latest data available).

Where are solar power plants located in Montenegro?

Montenegro is rich in solar radiation, particularly in the southern part, especially around the cities of Bar and Ulcinj, and in the area around the capital city of Podgorica. Solar power plants are located in these areas due to the high solar radiation.
