This plant directly uses solar energy to produce hydrogen, which is then made available at the public hydrogen refuelling station for trucks and heavy-duty applications.

The 100MW Sores IGaib Power Station is about 33km northwest of Rosh Pinah in the Kharas Region of southern Namibia. It is to be developed by a joint venture between China ...

Yet the country faces an uphill battle to realizing its energy transition goals, largely due to its aged infrastructure and a lack of local expertise in green technology.

Integrated Solar-Wind Power Container for Communications This large-capacity, modular outdoor base station seamlessly integrates photovoltaic, wind power, and energy ... A globally ...

Technological advancements are dramatically improving solar storage container performance while reducing costs. Next-generation thermal management systems maintain optimal ...

The project, located in Rosh Pinah in southern Namibia, will be built by China's Jiangxi International Economic and Technical Cooperation Company and Chint New Energy ...

The project supports Namibia's efforts to enhance its renewable energy infrastructure and is expected to significantly contribute to the country's electricity supply ...

Upon completion, the power station is expected to make a notable contribution to Namibia's energy mix by increasing the share of renewable energy, reducing dependency on ...

The government has made strides in availing of its good renewable energy resources, hoping to break years of over-reliance on ...

The government has made strides in availing of its good renewable energy resources, hoping to break years of over-reliance on fossil fuel imports, hydroelectric power ...

Yet the country faces an uphill battle to realizing its energy transition goals, largely due to its aged infrastructure and a lack of local ...

The Windhoek project uniquely addresses what engineers call the "duck curve dilemma" - that awkward afternoon when solar overproduction threatens grid stability. By absorbing excess ...

Upon completion, the power station is expected to make a notable contribution to Namibia's energy mix by increasing the share of ...
