The 146MW Tanahu project isn't your grandpa's pumped storage. Its AI-powered turbines predict rainfall patterns using Himalayan glacier melt data, achieving 89% round-trip efficiency.

Commissioned in 1982, it was Nepal's first large-scale hydropower facility designed with peaking capability. The project took nearly a decade to complete, involving complex ...

Nepal has only two storage projects--Kulekhani I (60 MW) and Kulekhani II (32 MW). The project, which will be Nepal's third storage ...

Two reservoirs will be constructed by building dams of about 45 and 103m in the Hugdi (upper area) and Mowa (lower area) rivers, respectively, said the NEA. The power plant ...

In this study, we assess the potential of pumped storage hydropower across Nepal, a central Himalayan country, under multiple configurations by pairing lakes, rivers, and ...

This monumental project strategically utilizes two reservoirs at different elevations to adeptly store and release water, playing a pivotal role in providing grid stability and flexibility.

Nepal has only two storage projects--Kulekhani I (60 MW) and Kulekhani II (32 MW). The project, which will be Nepal's third storage type, is 150 km west of Kathmandu on ...

The Nepal Electricity Authority is prioritizing the construction of pumped storage hydropower projects to address fluctuations in electricity demand at different times of the day ...

Two reservoirs will be constructed by building dams of about 45 and 103m in the Hugdi (upper area) and

Mowa (lower area) rivers, ...

This monumental project strategically utilizes two reservoirs at different elevations to adeptly store and release water, playing a pivotal ...

Two large storage projects under discussion in Nepal are the 1,200 MW Budhi Gandaki Storage Hydropower Project with capacity of generating 3,383 GWh of energy ...

Nepal marked a major milestone in its journey toward green mobility with the inauguration of Nepal's First Liquid-cooled Supercharging EV Station powered by Huawei ...

Two large storage projects under discussion in Nepal are the 1,200 MW Budhi Gandaki Storage Hydropower Project with capacity of ...

Kathmandu, March 2, 2025 - The Nepal Electricity Authority (NEA) has prioritized the development of pumped storage hydropower projects to manage daily fluctuations in electricity ...
