Zurich introduced a new policy that promotes renewable energy adoption: rooftops with a surface area of more than 300 square ...

The project aims to gather and analyze the real-life experiences of photovoltaic system owners to identify and address the barriers to ...

Thousands of Zurich residents now call more than 40,000 m² of solar panels on 44 systems "their own". Every year, ewz plans and implements new systems on buildings belonging to ...

Software automatically adjusts the adaptive solar facade with the help of artificial intelligence and self-learning algorithms to maximize solar yield, heat reduction and daylight. ...

Solskin tracks the sun and intelligently shades interior spaces, making it the first movable photovoltaic facade of its kind. This innovation allows Solskin to generate up to 40% more ...

OverviewSolar productionOppositionFeed-in tariffs 2009 (KEV)Energy Act 2017In 2021, Switzerland's photovoltaic (PV) installations increased to 685 MWp from 475 MWp in 2020. The Federal Energy Act, revised and effective from 1 January 2018, changed the support scheme for PV systems: it extended the one-time investment subsidy to all sizes of PV systems, ranging from 2 kW to 50 MW. Additionally, in 2022, the investment subsidy formula was updated to encourage investments in larger PV capacities and more efficient use of rooftop space.

Zurich-headquartered KIBAG commissioned the 1.254MW rooftop solar project at its Regensdorf facility, developed by Swiss Renewable Solutions. AESOLAR supplied the ...

Switzerland's floating solar project on the Alps marks a major advancement in sustainable energy solutions. By utilizing high-altitude reservoirs, the country is not only ...

Switzerland's floating solar project on the Alps marks a major advancement in sustainable energy solutions. By utilizing high-altitude ...

The project aims to gather and analyze the real-life experiences of photovoltaic system owners to identify and address the barriers to widespread solar energy adoption, such as cost concerns, ...

Summary: Zurich's new photovoltaic module project highlights Switzerland's push toward renewable energy. This article explores the project's goals, technological innovations, and its ...

Zurich-headquartered KIBAG commissioned the 1.254MW rooftop solar project at its Regensdorf facility, developed by Swiss ...

Zurich introduced a new policy that promotes renewable energy adoption: rooftops with a surface area of more than 300 square meters will have to be fully equipped with PVs!

Despite initial setbacks, the project is now set to expand to install solar panels on 50 additional noise barriers in Zurich and Schaffhausen. Sun-Ways has developed a unique ...

Despite initial setbacks, the project is now set to expand to install solar panels on 50 additional noise barriers in Zurich and ...

The AlpinSolar project, comprising nearly 5000 solar panels on Switzerland's Lake Muttsee dam, harnesses high-altitude sunlight and snow cover to maximize energy production, particularly in ...
