Does Ottawa have a battery energy storage plan?

In 2025, the City of Ottawa established official plan and zoning provisions for battery energy storage use in accordance with new Official Plan policy. BESS is an emerging technology using batteries and associated equipment to store excess energy from the electrical grid, which can then discharge energy in periods of high demand.

Do investors underestimate the value of energy storage?

While energy storage is already being deployed to support grids across major power markets, new McKinsey analysis suggests investors often underestimate the value of energy storage in their business cases.

What is the incentive structure for energy storage?

The incentive structure is intended to price signals incent the asset to operate in an economically efficient manner, while avoiding contract-related must-offer conditions or an offer window. In today's market, energy storage is not scheduled or dispatched holistically in the IESO's dispatch and scheduling software.

Is there a Bess project in West Ottawa?

Yes, there are two transmission scale BESS projects proposed in rural west Ottawa. One in West Carleton-March (Ward 5) and the other is in Rideau-Jock (Ward 21). Are there land use impacts associated with BESS?
