---

These innovative CO2 batteries from Energy Dome promise long-duration energy storage for the grid, and reliable 24/7 clean power for data centers.

From products to platforms, and from innovation to collaboration, Hoenergy is taking an open, forward-looking approach to ...

Well, there you have it--the messy, exciting reality of modern energy storage expansion. It's not just about megawatts and dollars, but about building systems that adapt, endure, and ...

From products to platforms, and from innovation to collaboration, Hoenergy is taking an open, forward-looking approach to connect global partners and unlock deeper value ...

On June 12, at the ongoing SNEC 2025 exhibition, Hoenergy made a powerful statement with its technological excellence and ...

Recently, Canadian Solar (CSI Solar), Sunwoda, Risen Energy, and China Energy Engineering Corporation (CEEC) have successively signed contracts for overseas energy ...

Looking ahead, the overseas new energy storage industry isn't just about bigger batteries - it's about smarter systems. From AI-driven energy trading platforms to storage-as-a-service ...

In another record-breaking year for energy storage installations, the sector has firmly cemented its position in the global electricity market and reached new heights. From ...

Synthesis of Ember's key findings from 2025, tracing how clean electricity expanded, where new growth centres emerged and how technologies like batteries and ...

On June 12, at the ongoing SNEC 2025 exhibition, Hoenergy made a powerful statement with its technological excellence and innovative solutions, officially launching its ...

The International Energy Agency forecasts global investment in battery storage facilities will rise 16% this year to \$66 billion.

The global energy storage market is poised to hit new heights yet again in 2025. Despite policy changes and uncertainty in the world's two largest markets, the US and China, ...
