Does the Philippines need energy diversification?

Recent global trends have made the Philippines more aware of the need for energy diversification, including nuclear energy/small modular reactors (SMRs) and energy storage. In the past, decisions centered around the price, but the need to have multiple sources to ensure business continuity now seems to be recognized.

How will the Philippines achieve energy security?

The Philippine government envisions the Philippines will increase its renewable energy (RE) share in supply mix to 35% by 2030 and 50% by 2050, promote energy efficiency and conservation, and pursue emerging technologies to achieve energy security.

Is the Philippines facing an energy crisis?

The Philippines is facing a mounting energy crisis as the Malampaya natural gas fields, currently supplying 30% of Luzon's energy consumption, are expected to be depleted by 2024-2025.

The Philippines is exploring the potential to export renewable energy to Taiwan and other regional partners, Energy Secretary Raphael Lotilla confirmed in a media briefing ...

The passage of Republic Act No. 11234, entitled "Energy Virtual One-Stop Shop (EVOSS) Act" on 08 March 2019 paved the way for streamlining and expediting the permitting ...

The Philippines energy storage system market is expanding due to the growing adoption of renewable energy, advancements in battery technologies, and the need for grid ...

The Energy Storage Summit Asia 2025, held in the bustling capital of the Philippines, Manila, gathered industry experts and innovators to discuss the next phase of the ...

**Market Growth & Challenges** The Philippine energy storage market is projected to hit \$780 million by 2026.

But let's not pop the champagne yet. Battery imports still face 12% tariffs, and fire ...

This auction's focus will be mostly on renewable energy facilities that are not eligible for feed-in-tariffs (FIT), such as geothermal, impounding and pumped storage.

This auction's focus will be mostly on renewable energy facilities that are not eligible for feed-in-tariffs (FIT), such as geothermal, ...

Off-grid and micro-grid solutions, such as energy storage systems and rural electrification enhancements, allow additional solutions. USAID-funded projects present ...

The energy storage systems market in the Philippines deals with technologies that store energy for later use. Key players in this market could include companies like Tesla Philippines and ...

The Philippines is exploring the potential to export renewable energy to Taiwan and other regional partners, Energy Secretary Raphael ...

The Philippines is taking a decisive step toward firm renewable energy capacity, with the latest round of its Green Energy Auction (GEA-4) marking the country's most storage ...

Department of Energy (DOE) said that the Philippines is exploring innovative solutions to optimize renewable energy integration and reduce costs, with Battery Energy Storage Systems (BESS) ...
