Solar-powered containers, telemedicine integration, and eco-friendly materials are some of the developments that could shape the ...

Such a solar container can be delivered almost anywhere -- from disaster areas to remote villages -- and it takes just a few hours to set up. It powers lighting, communication systems ...

A shipping container clinic is a type of shipping container architecture using intermodal containers (shipping containers) as the structural element of a medical clinic that can be easily deployed to remote regions of the world. Shipping containers are ideal because of their inherent strength, wide availability and relatively low cost. In addition, and most relevant, shipping containers can be deployed anywhere in the world with the clinic already assembled within the container. This me...

A shipping container clinic is a type of shipping container architecture using intermodal containers (shipping containers) as the structural element of a medical clinic that can be easily deployed ...

The clinics are constructed from recycled steel shipping containers and delivered throughout the world to villages, towns, war zones, jungles, deserts and just about any location ...

A solar-powered container can run lighting, sound systems, medical equipment or communications gear without waiting for grid ...

Find out how Clinic In A Can addresses healthcare challenges in disaster zones with solar-powered, flexible medical units.
