Off-grid solar systems, which operate independently of the central grid, offer a viable solution for electrifying India's tribal regions. These systems harness solar energy ...

Solar power sector in India has emerged as a fast-upcoming section in last few years. It supports the government agenda of sustainable growth, while, emerging as an integral part ...

The Refinery production (crude throughput) achievement was 2,21,773 TMT during 2020-21 which has increased to 2,41,703 TMT during 2021-22 i.e. a net increase of 9% over 2020-21.

Complete guide to off grid solar system in India, covering costs, components, benefits, and uses for homes and businesses in 2025.

CHENNAI: India's steel, cement and aluminum industries, long tethered to coal-powered operations, are poised to tap into a 20 gigawatt (GW) solar energy market that ...

Between 2014 and 2023, solar energy capacity in India expanded dramatically, fuelled by the decreasing costs of Photovoltaic (PV) ...

Greenfield refinery and petrochemical complex BPCL's board approved the commencement of pre-project activities for a greenfield ...

Greenfield refinery and petrochemical complex BPCL's board approved the commencement of pre-project activities for a greenfield refinery-cum-petrochemical complex ...

The study explores the feasibility of incorporating solar, wind, and biomass energy sources alongside the
