Can solar power solve North Korea's energy problems?

Jeong-hyeon, a North Korean escapee, told the Financial Times that many residents in Hamhung, the second-most populous city, "relied on a solar panel, a battery and a power generator to light their houses and power their television". But solar power is still only a partial solution to the country's energy woes.

Do solar panels work in Pyongyang?

Even in Pyongyang, solar panels appear to be commonplace on buildings and dwellings to supplement electricity shortcomings. Such panels can be seen on satellite imagery because they tend to be larger.

Where are solar water heaters located in Pyongyang?

Large solar water heaters on top of an apartment building and smaller individual solar electricity panels on the balconies of the same building at the Jangchon Vegetable Cooperative Farm in Pyongyang, as seen on KCTV on April 13, 2022. (Source: Korean Central Television)

But solar power is still only a partial solution to the country's energy woes. Why does North Korea need a solar power supply? An insufficient and unstable power supply is one of the critical ...

But what about regions with political constraints and underdeveloped infrastructure? North Korea's recent deployment of containerized energy storage vehicles (CESVs) shows how ...

North Korea is increasingly turning to solar power to help meet its energy needs, as the isolated regime seeks to reduce its dependence on imported fossil fuels amid chronic ...

Despite its political isolation and infrastructure limitations, North Korea represents a quiet but real opportunity for decentralized solar energy. From simple lighting systems in rural homes to ...
