Do data centers share blame for rising electric bills?

As electric bills rise, evidence mounts that data centers share blame. States feel pressure to act
HARRISBURG, Pa. (AP) -- Amid rising electric bills, states are under pressure to insulate regular household and business ratepayers from the costs of feeding Big Tech's energy-hungry data centers.

Is big tech causing your electric bills to rise?

Your electric bills may have shot up in recent months, and you might be tempted to blame your roommate or your old window air conditioner unit. However, it's not because of your roommate or your window unit. Ratepayer advocates warn that Big Tech's energy demand is hitting consumer wallets, with electric bills rising in 13 states due to data centers.

Could data centers' hunger for energy raise all electric bills?

The piece, titled "Data Centers' Hunger for Energy Could Raise All Electric Bills," explores how rising energy demands from tech-heavy data centers may push utilities to expand the electric grid--costs that, in many cases, won't be fully covered by those large users themselves.

Are American electricity bills rising to subsidize big tech?

But growing evidence suggests that the electricity bills of some Americans are rising to subsidize the massive energy needs of Big Tech as the U.S. competes in a race against China for artificial intelligence superiority.

With less supply in the overall market, prices go up and the public faces higher bills as a result. Many state legislatures are noticing ...

Over the past month, friends, family, and acquaintances have asked why their electricity bills have skyrocketed.

Customers of the biggest regional power grid operator in the US could see their bills go up next year, largely due to skyrocketing demand for electricity coming from AI data centers.

Amid rising electric bills, states are under pressure to insulate regular household and business ratepayers from the costs of feeding Big ...

Amid rising electric bills, states are under pressure to insulate regular household and business ratepayers from the costs of feeding Big Tech's ...

Starting in June, the electricity bill for a typical household in Ohio increased at least \$15 a month because of data centers, according to data from a major local utility and an ...

Electricity demand is expected to grow substantially over the next several decades as technology companies build large data centers for their artificial intelligence businesses.

With less supply in the overall market, prices go up and the public faces higher bills as a result. Many state legislatures are noticing these problems and working to figure out how ...

The piece, titled "Data Centers" Hunger for Energy Could Raise All Electric Bills," explores how rising energy demands from tech ...

That's partly because of data centers' immediate demand for energy, but also because grid operators are investing in new transmission lines and other gear to handle their ...

Amid rising electric bills, states are under pressure to insulate regular household and business ratepayers from the costs of feeding Big Tech's energy-hungry data centers.

The piece, titled "Data Centers" Hunger for Energy Could Raise All Electric Bills," explores how rising energy demands from tech-heavy data centers may push utilities to ...

But in at least three states with high concentrations of data centers, electric bills climbed much faster than the national average during that period.

Starting in June, the electricity bill for a typical household in Ohio increased at least \$15 a month because of data centers, according ...
