The Defense Ministry announced on Sunday the delivery of the first operational high-power laser interception system developed by Rafael Advanced Defense Systems Ltd., dubbed "Iron ...

Israel's in-development high-powered laser interception system, dubbed Iron Beam, is expected to become operational next year, the Defense Ministry said Monday.

The object is estimated to be between 10 and 20 kilometers wide and is moving rapidly toward the Sun. Improved telescope technology has enabled the detection of such ...

Strange objects from other star systems are passing through our solar system, and now scientists are racing to intercept them before ...

A strange visitor arrives. Old treaties feel suddenly fragile. And the race to control space accelerates under the cover of science. The object is real. The anomalies are ...

The first operational high-power laser interception system, dubbed "Iron Beam," has been delivered to the Israel Defense Forces, the Israeli Defense Ministry announced.

Israel's in-development high-powered laser interception system, dubbed Iron Beam, is expected to become operational next year, ...

The first operational high-power laser interception system, dubbed "Iron Beam," has been delivered to the Israel Defense Forces from Rafael Advanced Defense Systems, the ...

Strange objects from other star systems are passing through our solar system, and now scientists are racing to intercept them before they disappear forever.

Earlier this month, astronomers noticed a mysterious object speeding toward the inner solar system from outside of our star system.

The Defense Ministry announces the delivery of the first operational high-power laser interception system, dubbed "Iron Beam," from Rafael Advanced Defense Systems to the IDF. ...

Israel is moving towards the deployment of a high-powered laser system designed to intercept rockets, drones and other aerial threats, in what officials describe as a major ...
