One of the US's largest solar + battery storage projects is now fully online in Mojave, California.

Deployment: Projects that deploy residential, commercial, and utility scale energy storage systems for a variety of clean energy and clean transportation end uses.

There are over 1,350 major energy storage projects currently in the database, representing more than 108,000 MWh of capacity. The list shows that there are more than 185 ...

Los Angeles, Calif. - Clean Power Alliance (CPA), the nation's leading green power provider and California's largest community choice energy aggregator, continues to ...

We're developing America's solar energy and storage infrastructure, helping to increase domestic energy production to ensure the nation's energy security. In 2024, ...

By pairing utility-scale solar with advanced energy storage technology, Eland delivers low-cost electricity to meet LA's growing energy needs -- including when demand ...

Arevon Energy announced the completion of the two-phase Eland solar-plus-storage project, sited in Kern County, California. The project had capital costs of over \$2 billion ...

Once built, DCEP will be the largest battery energy storage system in the world, highlighting California's leadership in clean energy innovation and infrastructure.

The California Energy Commission (CEC) is reviewing a pair of enormous solar + storage projects proposed by Intersect Power subsidiaries that, if constructed, would each ...

These massive solar plus storage facilities are helping California move away from fossil fuels by delivering solar energy during evening hours and improving grid reliability.
