"If this proposal becomes law, nearly 300 U.S. factories--mostly in red states--could close or never open, and we simply won't have the energy we need to power ...

The Solar Energy Industries Association (SEIA) has issued a stark warning about recently passed House reconciliation legislation, stating that the current proposal could ...

Revenue from energy storage and solar installations grew from \$2 billion in 2020 to \$10.1 billion last year. Tesla's poor start to the year suggests that streak is about to come to an ...

In 2024, 91% of new renewable projects offered cheaper electricity than the lowest-cost, new-build fossil fuel alternative. The cost ...

The global energy storage market is poised to hit new heights yet again in 2025. Despite policy changes and uncertainty in the world's two largest markets, the US and China, ...

The energy storage sector maintained its upward trajectory in 2024, with estimates indicating that global energy storage installations rose by more than 75%, measured by megawatt-hours ...

Revenue from energy storage and solar installations grew from \$2 billion in 2020 to \$10.1 billion last year. Tesla's poor start to the year ...

The storage cost reduction, predicted by 2025, will have serious implications on the energy sector. Is this finally the tipping point for solar + storage technology adoption on a ...

With solar panels and wind turbines installed in more places--while energy storage capacity is still lagging--an especially sunny and windy day can generate more electricity than ...

Storage took an even bigger hit than solar, with venture capital and private equity falling 29% across fewer deals, public market funding down 43%, and just three mergers and ...

National summary: Solar pricing trends Quoted solar prices dropped to \$2.50 per watt, the lowest in history.

Storage took an even bigger hit than solar, with venture capital and private equity falling 29% across fewer deals, public market funding ...

In 2024, 91% of new renewable projects offered cheaper electricity than the lowest-cost, new-build fossil fuel alternative. The cost of battery energy storage systems for grid ...

The global energy storage market is poised to hit new heights yet again in 2025. Despite policy changes and uncertainty in the world's ...
