-----

Rapid growth in renewable energy deployment in Mexico could generate high levels of investment, increase energy access, reduce costs to consumers, and--together with other ...

Considering Mexico's vast solar and wind energy resources, including offshore wind power potential in the Pacific Ocean and the Gulf of Mexico, it's a shame that these clean, free ...

By 2030, Mexico anticipates adding 2.2 GW of battery energy storage systems as part of its broader energy strategy. This integration not only enhances the reliability of ...

However, the increased proliferation of renewables, estimated to average around 2.5GW of solar and 1.3GW of wind annually between 2023 and 2030, in the country's electricity grid has ...

But this vision remains aspirational in Mexico, where only two photovoltaic projects currently include storage systems. While the government has ambitious plans to boost ...

Thanks to the country's geographical conditions, Mexico has great potential for solar and wind energy, which makes it an ideal candidate for the implementation of energy ...

Phase III of the project will add 300 MW of solar PV capacity and 90 MW of battery energy storage with a three-hour duration, with an estimated investment of MXN 6.49 billion. ...

Power Mexico Fast-Tracks Approvals of 20 Renewables Projects with Energy Storage Last week, Mexico gave the go-ahead for 15 solar projects and five wind projects that will ...

The government granted 20 new power generation permits to national and international companies following a

call that concluded in December 2025. The authorizations, ...

But this vision remains aspirational in Mexico, where only two photovoltaic projects currently include storage systems. While the ...

Mexico is seeing a surge of large-scale solar and battery storage proposals across multiple states following an October decree that sets clearer rules for private energy investments.
