What is the largest solar power plant in Portugal?

On 9 October 2021, the largest solar power plant in Portugal was inaugurated in Alcoutim. With an installed capacity of 219 MW, the power plant has 661,500 solar panels and can power the needs of 200,000 homes. It occupies an area of 320 hectares and will prevent the emission of 326,000 tons of carbon dioxide every year.

How many solar panels are installed in Portugal?

The entire work cost more than 250 million with more than 376,000 solar panels, the power plant has a capacity of 62 MWp. On fixed structures, approximately 190,000 panels are installed, while 52 thousand Euro worth panels are installed on single-axis trackers. In Portugal, Galp begins construction on its first large-scale solar PV installation.

How does solar energy work in Portugal?

Solar energy can be captured using solar panels, which are made up of photovoltaic (PV) cells that convert sunlight into electricity. The Portuguese solar energy market is segmented by end-user. By end-user, the market is segmented into residential, commercial, and industrial (C&I).

How much solar energy does Portugal need?

(Updated October 2024) Solar energy is becoming a more important part of the Portuguese energy mix. Solar installed capacity reached 1.03 GW by the end of 2020, accounting for 3.6 percent of the total production of power. Portugal established a target of 6.4 gigawatts of installed capacity by 2023, with a goal of 9 gigawatts by 2030.
